Movicon11.2 Editor:

Safety of investment

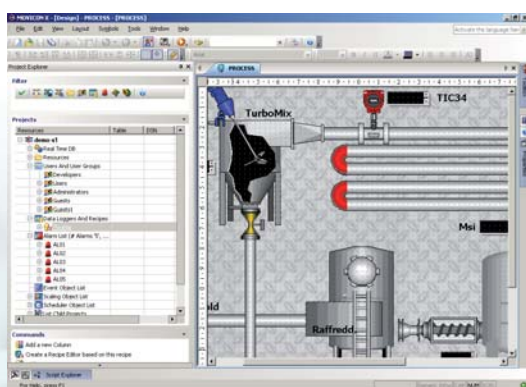

integrated project planning of Windows[®] Embedded CE up to Windows[®] 7 (Win32 C64).

Safety to progress

totally open architecture of XML based projects, OPC XML DA Client and Server tested on „OPC conformity“, new firewall

Graphical elements respectively objects can be saved in own libraries with all bequeathable attributes for further use.

Multi-lingual development tool, 16 Bit Unicode support for optional online language change in Runtime version.

applicable network technology including SOAP support.

Open standards

like Web Server, SMTP e-mail server, and RAS Services for modem, SMS transmission, are already available as of Windows CE 5.0. SQL CE 3.0 data base – supporting simultaneous access of several users.

Time-saving

automated **project planning** with Project Wizard. Interactive setup of whole project with automatic configuration of alarm-indicating incidence and history database including alarm and recipe management.

Easy-to-use

intuitive operator surface. Each element, object or graphic can be integrated by drag & drop in only three steps into the project. Automatic filters remove unvalid commands.

Scalable vector graphics

automatic project adaptation to the graphical target hardware. Horizontal and vertical display possible.

High security

for user access due to comprehensive administration of rights according to FDA standard. If necessary access to Windows system components like task manager, for example, can be disconnected through the API interface.

Pre-configured and freely scalable objects for alarm processing, recipe administration, online data base, history data base, graphical 2D and 3D diagrams. Data import for STEP7 from Siemens, OPC and CSV files.

Multi-driver interface with maximum four parallel drivers. Drivers for all common manufacturers and field bus systems available. Adaptation for diagnosis and parameterization properties. Integrated multithreading VBA Interpreter with direct access to all internal and external systems / project components.

Structured and distributed programming, projects can contain sub-projects for parallel planning in a combined overall project.

Movicon11.2 Runtime:

for Windows[®] CE 5.0 Core and Windows[®] Embedded CE 6.0

Features:

- XML and Web Services technology
- Animated templates with appealing graphic functions
- Graphic interface with standardised XP-object library
- Recipe administration based on related data bases
- Effective alarm management
- Historical event archive based on relational data bases
- SMS and E-Mail administration
- Historical and dynamic trends
- Conformity to FDA 21 CFR part 11
- Passwords with 1.024 user levels and 16 access areas
- Complete VBA support
- Data Logger via ADOCE (SQL) or IMDB(TXT)
- Access to web server via web browser supporting Java
- Extensive driver library
- Comprehensive symbol library
- Importing function for STEP7 from Siemens for Symbol-Data-Format (SDF and AWL)
- Multi terminal use
- Automatic reconnect
- Refactoring Explorer for easy fixing of project errors
- IP cameras can be integrated into the project
- Convenient project engineering offers beginners a fast and easy project planning
- Online-Remote-Debug via Ethernet connection
- New integrated Soft-Logic-PLC with STEP7 instruction set from Siemens
- New database management system in Text and XML format
- Project transfer per USB or Ethernet (FTP or TCP)
